ABOUT US

Mike Voice of Sutainability

Mike is a passionate sustainability consultant dedicated to driving positive change in the corporate world. With a strong foundation in Environmental, Social, and Governance (ESG) principles, Mike launched his consultancy in 2024 with a clear mission: to raise awareness of what companies are doing—and what they can do better—in these crucial areas.

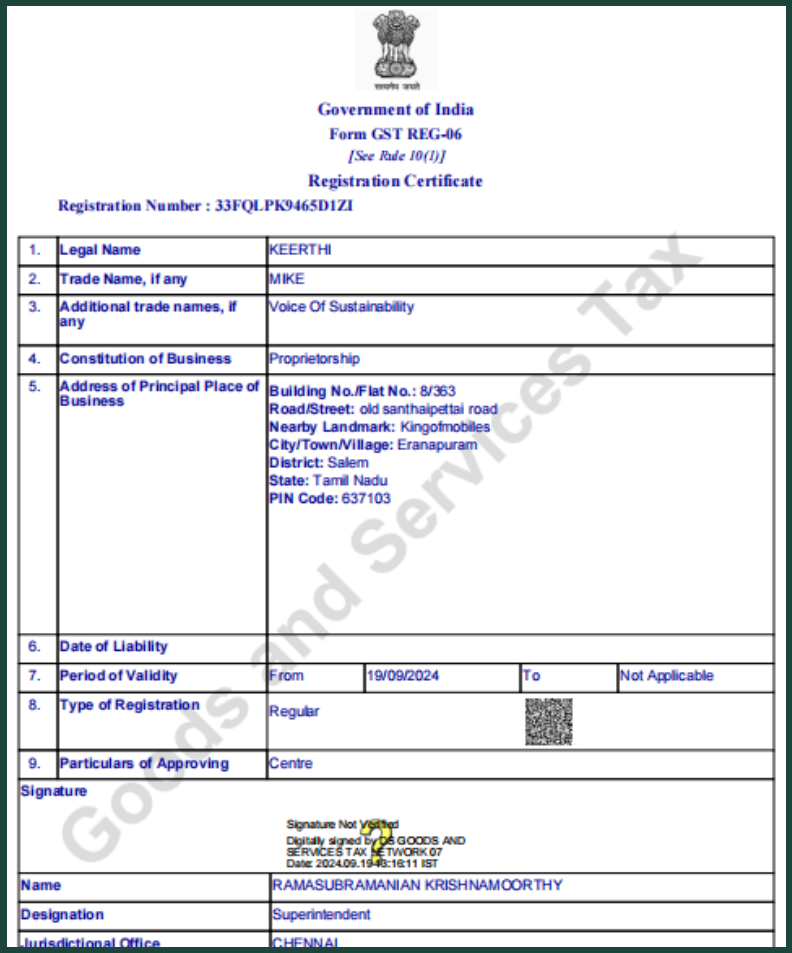

Vision:

"Empowering businesses to lead with integrity, transparency, and responsibility, creating a sustainable future for all."

Mission:

"To support organizations in advancing their Environmental, Social, and Governance (ESG) goals by providing expert guidance, strategic insights, and fostering accountability in their sustainable practices."

Safety Training

Educate with ESG Works

- Providing training and full support for ESG (Environmental, Social, and Governance) oriented initiatives, such as EcoVadis and QESG, is crucial in helping organizations improve their sustainability practices. If you need any assistance with ESG-related topics, guidance on how to integrate ESG standards, or explanations about the specific requirements of EcoVadis and QESG

GHG ACCOUNTING

If you need assistance with understanding GHG protocols (like the GHG Protocol Corporate Standard) or want advice on calculating and reporting emissions (Scope 1, Scope 2, and Scope 3), I can provide more details. Additionally, if you are working on GHG emissions reductions strategies or communicating those findings to stakeholders

RENEWABLE ENERGY SERVICES

Renewable energy services are crucial for advancing the use of sustainable energy source es carbon Credits.

TRAININGS

Offering trainings and workshops related to ESG (Environmental, Social, and Governance) safety, as well as support for legal certifications, is crucial in helping organizations stay compliant with evolving regulations while building sustainable and ethical practices. Through your training programs, organizations can better understand ESG risk management, safety protocols, and the certification processes for key frameworks like ISO 14001 (Environmental Management), ISO 45001 (Occupational Health and Safety), and others. Your workshops can also help companies navigate legal compliance and certifications that align with ESG goals, ensuring they meet standards for environmental protection, social responsibility, and corporate governance.

Educate with ESG Works

A proper, professional ESG (Environmental, Social, and Governance) oriented training should cover various key areas to equip participants with the knowledge and skills necessary to integrate sustainability and responsible business practices into their work. Here's a breakdown of important points to include in such a training program:

- Environmental Criteria
- Social Criteria
- Governance Criteria
- ESG Strategy and Implementation
- ESG Reporting and Metrics
- Legal and Regulatory Landscape
- Stakeholder Communication and Engagement
- ESG Investment and Financial Impact
- Case Studies and Practical Applications
- ESG Trends and Future Outlook
- Conclusion and Certification

EDUCATIONAL SERVICES & TRAININGS

- ESG Awareness Training
- Introduction to ESG
- Climate Change and Business Impact
- Ecovadis Training
- ESG Reporting Training
- GHG Reporting Training
- Safety Training

RENEWABLE ENERGY SERVICES

Offerings that support the generation, management, and utilization of energy from renewable sources such as the sun, wind, water, biomass, and geothermal heat. These services are essential for promoting sustainable energy practices and reducing reliance on fossil fuels.

GHG ACCOUNTING

Process of measuring, reporting, and managing the emissions of greenhouse gases produced by an organization, project, or activity. The goal of GHG accounting is to quantify the amount of greenhouse gases released into the atmosphere, identify sources of emissions, and develop strategies to reduce those emissions, ultimately contributing to the mitigation of climate change

- Quantifying Emissions
- GHG Protocol Standards
- Data Collection and Measurement
- Emissions Reduction and Offsetting
- Verification as per ISO 14064

HG accounting is a crucial process for any organization aiming to understand and reduce its carbon footprint. It helps businesses identify their emissions sources, develop reduction strategies, comply with regulations, and meet sustainability goals. Through accurate GHG accounting, organizations can contribute to global efforts to mitigate climate change and build a sustainable future

Meet the Team

Mithunraj S

Sustainability Consultant | ESG Expert | HSE Specialist

- I specialize in Environmental, Social, and Governance (ESG) practices, sustainability strategies, and greenhouse gas (GHG) accounting.
